

# Errors in Admin Account Website

## Dashboard

1. Aren't these rates supposed to be dynamic and real time? I think they're hard coded here

 1 BTC = \$ 10196 ||  1 ETH = \$ 868 ||  1 BCH = \$ 5000 ||  1 BCT = \$ 0.5

2. Use Original symbols instead of golden symbols

 BITCOIN	 BTC Balance 94.99340000	 BCH Balance 100.99900000	 ETH Balance 99.96450000
 BITCOIN CASH	 BCT Balance 24,138	 USD Rate 0.5	
 ETHER			

3. Total Sell Tokens → Total Tokens Sold

Total Sell Tokens

4. Specify Unit (\$)

Token Rate

5. Date & Time

ICO Launch Date Time

6. Does admin need a referral code?

**User Referral**

## Users

1. It is very difficult to manage the table with a scroll bar. Make it so that it all fits in one view.

Showing 1 to 10 of 11 entries	Previous	1	2	Next
<div></div>				

### 2. Multiple Changes

- a. Are you sure **you want** to Block?
- b. You really sure **you want to** block!
- c. Yes, Blocked it

## Are you sure To Block?

You Really Sure Of Block !

Cancel

Yes, Blocked it!

### 3. Multiple Changes

- a. Are you sure **you want to Activate?**
- b. You really sure **you want to Activate!**
- c. Yes, **Activate** it

## Are you sure To Active?

You Really Sure Of Active !

Cancel

Yes, Active it!

Withdrawal Request

- 1. Multiple Changes
  - a. Are you sure **you want** to Confirm?
  - b. You really sure **you want to** confirm!

Are you sure To Confirm?

You Really Sure Of Confirm !

Cancel

Yes, Confirm it!

User’s Bounty

- 1. Redundant Information. Instead, admin should be able to see screenshots of approved bounties

Bounty Screenshots		Status
✓ Approve		✓ Approve
✗ Reject		✗ Reject
✓ Approve		✓ Approve
✓ Approve		✓ Approve
<div>View</div>		⌛ pending

## Rates Setting

1. Add unit of bonus

Bonus ↑
20

## Transaction

1. User Buy Token.... → user **bought** token with BTC wallet

User Buy Token With BTC Wallet.
---------------------------------
