Mistakes & Errors in User Account Website - Version 2

Deposit Page

- 1. Something is broken in this page. There is no mechanism to enter an amount to deposit, and submit a request to the admin. [New] [High Priority]
- 2. Change colour of the warning "Please do not". Its barely readable. [New]

Deposit Amount **BTC Deposit Transact** Sr. Address 38ActpbUQSnX 1 2 3PdfkZ9KwcLbl Address 35rJYsJxmeeQUoYCNDM6xfrcdNsjF9osA7

Dashboard

1. Aren't these rates supposed to by dynamic and real time? I think they're hard coded here [Still Unsolved]

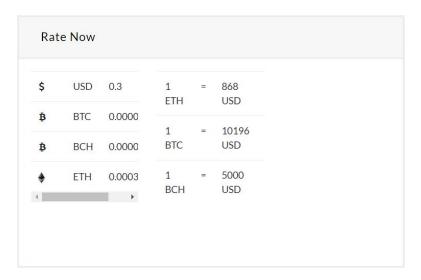

2. Use Original symbols instead of golden symbols in top strip as well [Still Unsolved]

ICO → Buy BCT Token

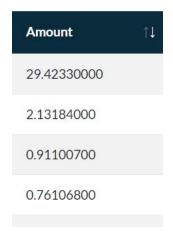

1. Identical symbols used for BTC and BCH [Still Unsolved]

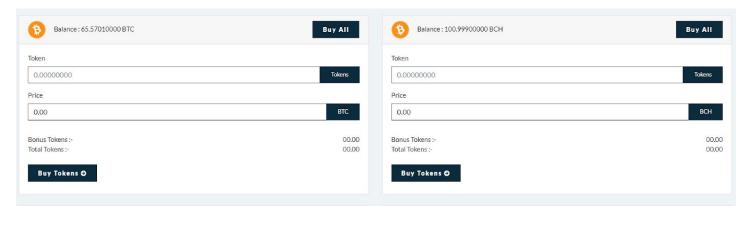

- Multiple Errors
 - a. Rate Now → Current Rate [Still Unsolved]
 - b. A lot of Extra space on the right, the slider can be done away with. [Still Unsolved]
 - c. 1 ETH = 868 USD should in 1 single line [Still Unsolved]
 - d. Symbols for currencies gone [New]

 What does this Amount correspond to? If it is the amount of buying currency(BTC, ETH, etc), move this column right before the TYPE column [Still Unsolved]

4. Suggestion: Instead of different Cards for each currency, make a menu to choose between various currencies(similar to what is done for Profile Setting, Two FA, Change Password) and then display a single card for that currency. Makes the UI less cluttered [Still Unsolved]

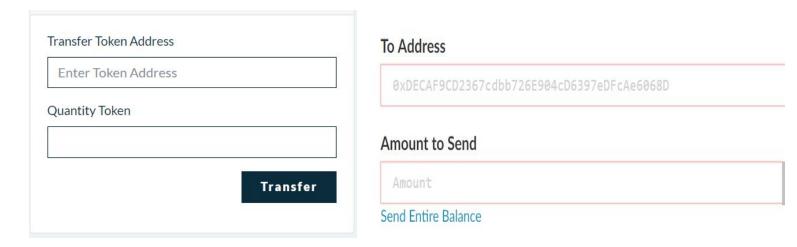

5. Add a new payment method, 'Cash', which will display the bank details to deposit fiat currency into an account. Once deposited, users will have the option to submit a request to the admin. Once the admin receives the money, he can approve the request and tokens will be credited to the user account like other methods. [New]

ICO → Transfer BCT Token

- CONFUSION: What does this page do Transfer token from one whitelisted user to another whitelisted user? If yes, why? A user can change his ETH address at any point of time. [Still Unsolved]
- 2. Multiple Errors
 - a. Transfer Token Address → To Address [Still Unsolved]
 - i. Placeholder Text (Enter Token Address) → Display a sample ETH address, possibly a company address [Still Unsolved]
 - b. Quantity Token → Amount to Send [Still Unsolved]
 - Placeholder Text → Amount [Still Unsolved]
 - c. Add an option to send entire balance [Still Unsolved]

ICO → ICO Information

1. BTC, BCH, ETH price varies continuously, so how can it be fixed here? [Still Unsolved]

- // Car				BCH Price	ETH Price
1 0-	- 8 M	0.30	0.00002942	0.00006000	0.00034562
2 8-	- 16 M	0.35	0.00003433	0.00007000	0.00040323
3 16	6 - 24 M	0.40	0.00003923	0.00080000	0.00046083

- 2. Who will pay the gas cost/ transaction cost for the withdrawn amount? It appears that the admin will have to pay the tx costs. [Still Unsolved]
- 3. Symbol for BTC and BCH is same [Still Unsolved]

Left Menu

1. Put Kyc, Login History and Referral List inside Profile, declutter this menu [Still Unsolved]
