# Mistakes & Errors in User Account Website
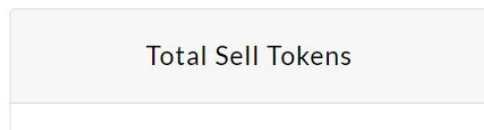

Dashboard

1. Aren't these rates supposed to by dynamic and real time? I think they're hard coded here

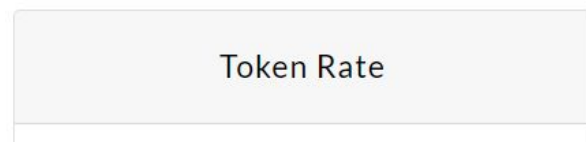

2. Use Original symbols instead of golden symbols

3. Total Sell Tokens → Total Tokens Sold

4. Specify Unit ($)

5. Date **&** Time

6. Calender → **Calendar**

Profile

1. Barcode not visible until clicked on "Enable 2FA".

3KQD7ED2B5A3CX3M

4.Your phone will now be in "scanning" mode. When you are in this mode, scan the barcode below:

2. Unnecessarily shows Success message - 'Your Profile updated successfully' on "Change Password"

Profile setting	Two factor Auth	Change password

Your Profile updated successfully

ICO → Buy BCT Token

1. Missing space between BCT and Token

Total BCTToken

2. Sold BCT → BCT Sold

Sold BCT

3. Color scheme mismatch, Write D, H, M, S in complete words

ICO Begins in

5	15	5	32
D	H	M	S

4. Identical symbols used for BTC and BCH

Balance : 94.99340000 BTC   Buy All   Balance : 100.99900000 BCH   Buy All

5. Token Buy Succssfully → Token Bought Successfully (2 Errors)

1000000 Token Buy Succssfully.

6. Multiple Errors
   a. Rate Now → Current Rate
   b. A lot of Extra space on the right, the slider can be done away with.
   c. **1 ETH = 868 USD** should in 1 single line

Rate Now					
$	USD	0.3	1 ETH	=	868 USD
฿	BTC	0.0000	1 BTC	=	10196 USD
฿	BCH	0.0000			
♦	ETH	0.0003	1 BCH	=	5000 USD

7. Confirm → confirmed

Status	↑↓
Confirm	
Confirm	
Confirm	

8. What does this Amount correspond to? If it is the amount of buying currency(BTC, ETH, etc), move this column right before the TYPE column

Amount	↑↓
29.42330000	
2.13184000	
0.91100700	
0.76106800	

9. Suggestion : Instead of different Cards for each currency, make a menu to choose between various currencies(similar to what is done for Profile Setting, Two FA, Change Password) and then display a single card for that currency. Makes the UI less cluttered

B Balance : 65.57010000 BTC	Buy All
Token	
0.00000000	Tokens
Price	
0.00	BTC
Bonus Tokens :-	00.00
Total Tokens :-	00.00
Buy Tokens ⊙

Profile setting	Two factor Auth	Change password

ICO → Transfer BCT Token

1. CONFUSION : What does this page do Transfer token from one whitelisted user to another whitelisted user? If yes, why? A user can change his ETH address at any point of time.
2. Multiple Errors
    a. Transfer Token Address → To Address
        i. Placeholder Text (Enter Token Address) → Display a sample ETH address, possibly a company address
    b. Quantity Token → Amount to Send
        i. Placeholder Text → Amount
    c. Add an option to send entire balance

Transfer Token Address

Enter Token Address

Quantity Token

Transfer

To Address

0xDECAF9CD2367cdbb726E904cD6397eDFcAe6068D

Amount to Send

Amount

Send Entire Balance

3. Send → Sent

Description ↑↓

ttest send 256 Tokens to vujaqo.

4. Sender and receiver can be same, clogging the network with useless transactions

ttest send 25 Tokens to ttest.

ICO → ICO Information

1. Calendar ICO → ICO Calendar

Calendar ICO

2. BTC, BCH, ETH price varies continuously, so how can it be fixed here?

Sr.	Sold	USD Price	BTC Price	BCH Price	ETH Price
1	0 - 8 M	0.30	0.00002942	0.00006000	0.00034562
2	8 - 16 M	0.35	0.00003433	0.00007000	0.00040323
3	16 - 24 M	0.40	0.00003923	0.00008000	0.00046083

3. Wrong date and Time

ICO time: January 10 2018, 10 am -NewYork time (GMT - 5)

4. Sold BCT → BCT Sold

Sold BCT

5. Who will pay the gas cost/ transaction cost for the withdrawn amount? It appears that the admin will have to pay the tx costs.

Coin	↑↓	Name	↑↓	Total Balance	↑↓	Action	
₿		BTC		65.57010000 BTC		Deposit	Withdraw
₿		BCH		100.99900000 BCH		Deposit	Withdraw
◆		ETH		99.96450000 ETH		Deposit	Withdraw

6. Your **withdrawal** request for 30 BCT **has been submitted** successfully. After Admin Confirm**ation, requested** amount will be credited **to** your address.

Your withdraw Request for 30 BCT successfully. After Admin Confirm Request Amount will credited your address

7. Amount(**USD**) → Amount(**ETH**). Under all pages, the respective currencies should be listed instead of USD.

Id	↑↓	Address	↑↓	Txid	↑↓	Status	↑↓	Token	↑↓	Amount(USD)	↑↓	Coin Type	↑↓
1		0x18c9801811661dce734644ff0a3aefd43ad17908				Pending		0		98.00000000		ETH	

Transaction

1. User Buy Token…. → user **bought** token with BTC ~~wallet~~

User Buy Token With BTC Wallet.

2. User Deposit… → user **deposited** 0.59… BCH ~~Amount~~

User Deposit 0.05956530 BCH Amount.

3. User Withdrawal… → user **withdrew** 98 ETH ~~Amount~~

User Withdrawal 98.00000000 ETH Amount.

4. Send → **sent**

Description ↑↓

ttest send 256 Tokens to vujaqo.

Login Histories

1. Login History → Timestamp

Left Menu

1. Login Histories → **Login History**
2. Transaction → **Transaction History**
3. Kyc → **KYC**
4. Put Kyc, Login History and Referral List inside Profile, declutter this menu
5. Pages should be ordered according to their priority
   a. Dashboard
   b. ICO
   c. Wallet
   d. Transaction History
   e. Profile
   f. Polls
   g. Bounty Dashboard
